

Interior Blinds

Made to measure. Fitted to last.

Dunne Eco | great joinery, from our family to yours.

The right blind makes a room.

We've been fitting joinery across the midlands for years, and blinds are one of those things that customers often leave as an afterthought. They shouldn't be.

A well-chosen blind controls light, adds warmth, and ties a room together. A poorly chosen one does none of those things and ends up rolled up at the top of the window for the next five years.

We supply a full range of interior blinds from Dama, a specialist Polish manufacturer with decades of experience in blind production. Every blind is made to measure for your window, available in a wide choice of fabrics, and fitted by us.

Whether you're fitting out a new build or replacing tired old blinds in your home, we can help you get it right.

Roller Blinds

Clean lines. Simple operation. Works in any room.

Roller blinds are the most popular choice for a reason. They're straightforward to use, easy to clean, and available in hundreds of fabric options, from sheer light-filtering fabrics to full blackout.

We offer roller blinds in multiple mounting systems to suit your window type:

Standard - wall or ceiling mounted, ideal for most domestic windows.

BEST 1 - a slim flat aluminium cassette that sits flush against the glass for a neat, modern finish. A good choice where you want minimal visual bulk.

BEST 2 - a deeper aluminium box cassette, tidier than a standard roller when the blind is fully retracted.

BEST 1 - Slim flat cassette

BEST 2 - Deeper box cassette

Pleated Blinds

A softer look, without losing control of the light.

Pleated blinds use a single layer of crisp, concertina folded fabric that stacks neatly at the top of the window when raised. They sit closer to the glass than a roller blind and have a softer, more considered look. A good fit for living rooms, dining rooms, and bedrooms where you want something that adds to the room rather than just covering the window.

The fabric range covers light-filtering, room-darkening, and blackout weights, so you're not sacrificing function for the look.

Skylight and roof windows. Pleated blinds are one of the best options for roof and skylight windows. The folded mechanism works naturally on angled glass and the blind can be operated from both the top and the bottom. We supply an integrated pleated skylight blind that fits directly into the window frame for a flush, built-in finish.

If you've got VELUX or similar roof windows and haven't found a blind that works, this is worth a look.

Roof & Skylight Blinds

Standard blinds don't work on roof windows. These do.

Angled glazing, overhead windows, and skylights need a blind built for the position. A standard roller mounted on a flat wall won't cut it when the glass is above your head or set at 45 degrees.

We supply blinds across several systems specifically designed for roof installations. Spring-operated options pull from the bottom up, which makes sense on a window you're reaching up to operate. Integrated systems fit directly into the window frame, no visible brackets, no gap around the edge.

Pleated and roller options are available for roof windows. If you're unsure which suits your window type, we're happy to come out and take a look before you order anything.

Roof pleated blind system

Day & Night Blinds

Light when you want it. Privacy when you need it.

Day and night blinds use two layers of alternating sheer and opaque fabric. Align the bands one way and light filters through. Shift them and the room blocks out. You can sit anywhere in between.

They look well in living rooms, kitchens, and home offices. Rooms where you want to manage light across the day without going from full brightness to full blackout.

Available across most of our roller systems including BEST 1, BEST 2, Standard, and Mini formats. The fabric bands come in a range of colours and wood-effect finishes.

Fabric & Custom Print Blinds

Your room, your design.

Our fabric blinds come in a wide range of plains, patterns, and textures. If you have a specific colour scheme or interior style in mind, we can help you find a fabric that fits.

For something a bit different, we also offer photo print blinds. You supply the image file and we have it printed directly onto the blind fabric. A popular choice for children's rooms, feature walls, and commercial spaces that want something that stands out.

All fabric blinds are made to measure and can be ordered in blackout, light-filtering, or sheer weights depending on the room.

Large Format & Motorised Blinds

For the windows that need a bit more thought.

Wide windows, tall windows, and commercial glazing need systems built for scale. Our large-format blinds run on heavier-duty mechanisms and are available in widths and drops beyond what standard domestic systems can handle.

Motorised options are available across the range. Control via remote, wall switch, or smart home integration. A good option for hard-to-reach windows, large glazed areas, or anyone who would rather not pull a chain every morning.

Fabric & Finish Options

The blind is only as good as the fabric you put in it.

Every blind we supply is available in a wide range of fabrics, and the choice matters more than most people expect. The same window dressed in a sheer white linen fabric and a charcoal blackout looks like two completely different rooms.

Light filtering. Softens incoming light without blocking it. Good for living rooms and kitchens where you want natural light during the day but still want some privacy from the street.

Room darkening. Reduces light significantly without full blackout. A solid choice for bedrooms where you want to sleep past 6am in summer.

Blackout. Blocks light completely. The obvious pick for bedrooms, but also worth considering for home offices, media rooms, and anywhere a screen is involved.

Sheer. Near-transparent fabric that diffuses light and maintains an open feel. Works well layered with a heavier blind or curtain for flexibility across the day.

Plain colours, textured weaves, wood-effect prints, and custom photo prints are all available depending on the blind type.

How It Works

No guesswork. No measuring mistakes. No trips back.

1. Get in touch.
Call us, email us, or fill in a quote request on dunneeco.ie. Tell us roughly what you are looking for and we will take it from there.

2. We come to you.
We will arrange a time to visit, take accurate measurements of your windows, and talk through fabric and system options on site. No obligation to order on the day.

3. We place the order.
Once you are happy with the spec, we order your blinds direct from the manufacturer. Every blind is made to your exact measurements.

4. We fit them.
When the blinds arrive we come back and fit everything. We take away any packaging and make sure everything is working before we leave.

Frequently Asked Questions

How long does it take from order to fitting?

Lead times vary depending on the blind type and fabric, but most orders are turned around within three to four weeks. We will give you a more accurate timeframe when you order.

Can I order blinds for just one window?

Yes. There is no minimum order. Plenty of customers come to us for a single awkward window they have not been able to sort elsewhere.

Are your blinds child safe?

All blinds we supply meet current Irish and EU child safety regulations. Cordless and motorised options are available if you prefer to avoid cords entirely in rooms used by young children.

Do you offer measuring and fitting service, or supply only?

Both! If you'd rather measure and fit yourself, we can supply the blinds to your exact specifications. Most customers prefer us to handle the whole process, but the choice is yours.

Do you supply blinds for commercial properties?

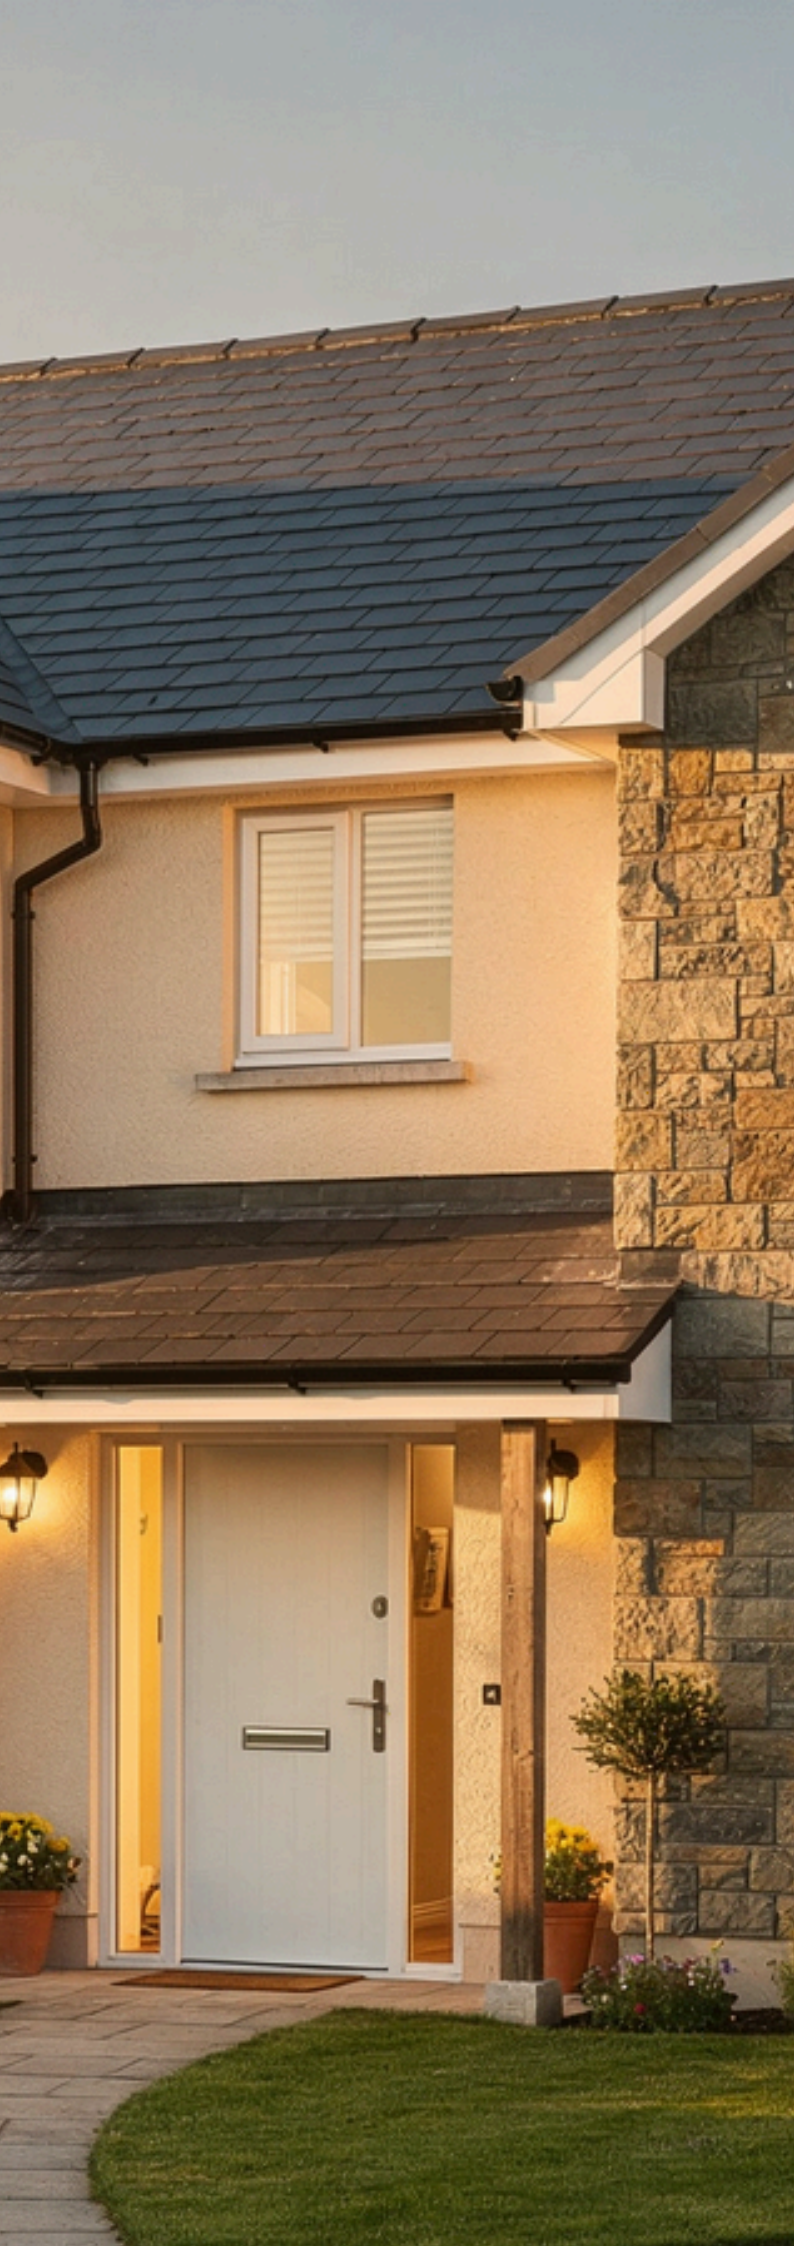

Yes. We can fit blinds in offices, schools, and commercial buildings across the midlands. Large format and motorised systems are available for bigger glazed areas.

How do I clean my blinds?

Most fabric blinds can be wiped down with a damp cloth. Avoid soaking the fabric or using harsh cleaning products. For heavily soiled blinds, contact us and we will advise on the best approach for your fabric type.

What if something goes wrong after fitting?

Call us. We stand behind what we fit. If there is a fault with the product or the installation we will come back and sort it.

Why Dunne Eco?

We are a family business based in Tullamore. We have been in joinery for a long time and we know our product. When you call us, you talk to someone who can actually help.

Every blind we supply is made to measure. We take the measurements, order the blind, and fit it. You do not need to worry about getting it wrong.

We also supply doors, stairs, and windows. So if you are fitting out a new build or doing a full renovation, we can help with more than just the blinds!
