Unico XS Casement profile

The **UNICO steel system** combines style and performance with a **70 mm construction depth** and **glazing options up to 60 mm**.

Its **galvanized steel profiles** feature a stainless-steel **thermal break** for exceptional strength and **thermal efficiency**. Available in any **RAL K7** colour or **custom powder-coated** finish on request.

Perfect for **energy-efficient** buildings, the UNICO system is versatile enough for windows, doors, facades, and bespoke architectural elements.

A reference window (1200 × 1480 mm) achieves an impressive **Uw value of 1.05 with Ug = 0.5 (Ultimate frame).**
